INTERFIBER SERVICES

At Interfiber, we deliver scalable, secure, and innovative digital infrastructure solutions to power your business. Whether you're a startup, government, or enterprise, our services are designed to support your growth and transformation journey.

ISP AS A SERVICE (ISPaaS)

Launch your own Internet Service Provider—fully built and managed by Interfiber.

- Turnkey network deployment (wireless, LTE/5G, FTTx)
- GPON / XGPON / XSGPON / NG-PON2 infrastructure
- Core & edge BGP routing, NOC setup, Splynx integration
- Technical training and long-term operational support
- Ideal for municipalities, telcos, smart cities, and private operators.

CYBERSECURITY AS A SERVICE (CSECaaS)

Comprehensive protection for your business.

- Threat detection, firewalls, and endpoint protection
- Phishing and email security
- Vulnerability assessments & compliance support
- Real-time monitoring and response

INFRASTRUCTURE AS A SERVICE (IaaS)

Reliable compute and storage resources on demand.

- Virtual machines, storage pools, firewalls, and VPN
- High-availability environments with redundancy
- Private, public, or hybrid infrastructure
- Fully managed or self-managed deployment

VIRTUAL INFRASTRUCTURE AS A SERVICE (VaaS)

Quickly deploy test/dev or scalable virtual environments.

- Pre-built VM templates (Linux, Windows)
- Flexible resource allocation (CPU, RAM, storage)
- Ideal for remote offices, developers, and SaaS startups

BACKUP AS A SERVICE (BaaS)

Your data. Always safe. Always available.

- Automated, encrypted backups (local, cloud, hybrid)
- File-level or full image restore
- Disaster recovery plans and testing
- Fast RTO and RPO options

AI AS A SERVICE (AIaaS)

Add intelligence to your operations—without building it from scratch.

- Pre-trained AI models for NLP, vision, analytics
- Chatbots, recommendation engines, automation tools
- Model training, fine-tuning, and integration via APIs
- Business intelligence and prediction capabilities

DATACENTER AS A SERVICE (DCaaS)

Enterprise-grade hosting environments, ready for your workloads.

- Colocation racks, cages, and edge datacenters
- Redundant power, cooling, and connectivity
- Remote hands, smart monitoring, and DDoS protection
- Interconnects to major cloud platforms

PRIVATE & HYBRID CLOUD SOLUTIONS

Secure, flexible cloud environments tailored for your business.

- Private cloud using OpenStack, Proxmox, or VMware
- Hybrid architecture connecting cloud and on-prem
- Full control, compliance-ready, and scalable
- Secure VPN and MPLS integration

NEXTCLOUD HOSTING

A secure, self-hosted collaboration suite.

- File sync and sharing, groupware, video calls
- Document editing, team chat, and calendar tools
- Managed hosting or custom installations
